## ABOUT US

Advancing New Canadian Women in Technology (ANCWT) is a bridging employment program for new immigrants and Syrian refugee women who have technical skills (in Engineering, Technology, Computer Science and Information Technology) from their home country.

---

## OUR GOAL

To improve the integration process of skilled new immigrants and refugees with the Canadian job market as fast as possible

---

## WHAT WE DO

We provide intensive training to participants and place them to work in appropriate companies. The program includes information related to understanding: the job market, challenges of gender discrimination, the Professional Engineering licensing process of Professional Engineers Ontario (PEO), Ottawa's unique living conditions, etc

---

Advancing New  
Canadian Women in  
Technology  
(**ANCWT**).

---

---

ANCWT had noticeable high success rate with the pilot project in 2016. More than twenty participants were trained and placed in matching companies. These skilled women are completing the requirements for Engineering in Training (EIT) leading to Professional Engineer licensing in Canada.

ANCWT team is formed, and is building a strong, self-sustained program at the University of Ottawa. The program is seeking support (cash, and in kind) to enable us kick start full-fledged.

---

## SPONSORS

ANCWT has the support of the following groups and companies:

- University of Ottawa, Faculty of Engineering
- University of Ottawa NSERC Chair for Women in Science and Engineering (Ontario)
- Career Development Centre - University of Ottawa
- Professional Engineers Ontario (PEO)
- Foundation for Building Sustainable Communities (FBSC)
- Makers Space, University of Ottawa
- Ottawa World Skills Employment Centre
- Captical Welcome

## STAY TUNED!

ANCWT next phase of training, coming up early 2018 at the University of Ottawa
